Fidelity Engineering Corporation Acquires HVAC Concepts

BALTIMORE, MD (September 18, 2017) – Fidelity Engineering Corporation, a premier provider of high performance building solutions in the Mid-Atlantic region, announces that it has acquired a majority interest in HVAC Concepts. The acquisition was completed in the summer of 2017.

Founded in 1985, HVAC Concepts creates smart building systems using the best of intelligent equipment and devices and provides 24/7 real-time building operations, remote monitoring and alarm management services. Additionally, HVAC Concepts offers advanced analytics and Building Automation Systems solutions, as well as Energy Management Systems. Based in Frederick, HVAC Concepts serves the Baltimore, Washington, D.C and Northern, Virginia markets.

“Fidelity Engineering Corporation is very excited to welcome the talented team of HVAC Concepts to our organization,” says Dave Lanphar, CEO/Partner of Fidelity Engineering Corporation. “As a Fidelity company, HVAC Concepts will allow us to expand on our current building automation and systems integration offerings, giving our customers a superior product and service. This new partnership will also enhance our commitment to providing customers with our approach to proactive, world-class service”

About Fidelity Engineering Corporation

Fidelity Engineering Corporation is the premier provider of high performance building solutions in the Mid-Atlantic region. Its business is to create and maintain high-performance buildings by applying the latest in energy efficient mechanical systems, building automation and emergency power systems. Fidelity’s experience spans more than 70 years and includes working with some of the nation’s leading developers, property managers, data center managers and Fortune 500 companies.
